1. Feingold Presentations

PowerPoint style presentations can be of great use in getting the word out. Whether they're actually used as presentations, as pamphlets, or whatever, it's a good way of combining multimedia into a structured document.

An introductory presentation, pictured below is in development. It could use some tender loving care while it's dad is preoccupied with techie concerns. It'd be a great place to start working in RussForge.

Note:

Don't have PowerPoint? Check out Sun Microsystems' free Microsoft Office work-alike suite OpenOffice. The OpenOffice Impress program allows you to edit PowerPoint presentations. You can get the free, no-hassle download for Microsoft Windows, Mac OS X, and a number of Unixes at OpenOffice.org.

The Feingold '08 Presentation
