1. Overview

[Picture of 50 States Map Widget](#)

This widget is an interactive map that can help users find their state blogs and e-mail lists. If the state blog doesn't exist yet, it gives some pointers on how to start one up. It's a combination of the current [State Blogs Widget](#) and the [Google Maps API](#).

Everyone is welcome to use this widget, and the source code is available in the [public CVS repository](#). One easy way to incorporate this widget into your site is to copy this HTML into your site:

```
<iframe src="http://feingold08.sourceforge.net/apps/50blogs-map-small.html"
width="440px" height="310px">
<a href="http://feingold08.sourceforge.net/apps/50blogs-map.html"
target="50blogsmap"></a>
</iframe>
```

Which puts a small version of the interactive map on your page, giving the user the option to open a larger version of the map.

[Questions, comments, feature requests, and bug reports](#) are welcomed.

[Surf the repository](#) for more goodies.

2. Your Feedback

Here are some of the places that you can share your ideas about this and other RussForge tools with the developers:

- [Feature Requests](#)
- [Bug Reports](#)
- [Help Forum](#)
- [Blogger Forum](#)
